BECAUSE WE CAN

Syria faces tremendous challenges after years of conflict, which require innovative solutions to support reconstruction efforts and sustainable development.

SyriaFree

is an innovative company aiming to launch the **SRF** digital currency as a funding source for a construction company engaged in rebuilding Syria. By leveraging national expertise and capabilities, SRF focuses on developing residential complexes and reselling them to Syrian expatriates and foreign visitors. This approach aims to repatriate foreign currency investments, strengthen the Syrian economy, and enable the company to benefit from the profits generated by real estate sales.

Sharia Compliance

The economic and financial structure of SRF has been designed in full accordance with **Islamic Sharia principles**, ensuring it remains free from any forbidden suspicions.

The primary objective of launching SRF is to create **real capital** to finance reconstruction and building projects, which are projects of a productive and developmental nature, and are not based on usurious activities or illegal speculation.

- SRF's structure does **not** rely on interest-based lending or any form of riba.
- Capital raised through the token sale is invested in **real economic activities** backed by tangible assets, such as real estate and infrastructure.
- The profit margin generated by projects is deducted after actual income is generated, without guaranteeing a fixed return, which eliminates the suspicion of riba.

Consequently, SRF digital currency is fully compliant with Sharia standards, promoting investments in socially beneficial projects that contribute to genuine reconstruction and channel capital into the real economy.

Vision

We aspire to become pioneers in digital investment and a key contributor to Syria's revival by harnessing the power of **modern financial technologies** and digital currencies to deliver **sustainable economic solutions** that benefit the Syrian people and subscribers as investors.

Objectives

- Launch the **SRF** digital currency backed by a real reconstruction project, giving SRF digital currency real investment value and securing the necessary funding for the company's development plans.
- Generate profits for token holders through market trading.
- Inject foreign currency into the Syrian economy by marketing and selling residential units to the Syrian diaspora and foreign investors.
- Create job opportunities for Syrians within Syria, reducing unemployment and boosting the local economy.
- Contribute to rebuilding Syria's infrastructure.

Why SRF?

- Strong investment returns through reconstruction projects funded by the SRF digital currency.
- Liquidity and tradability in global digital asset markets.
- Contributing to Syria's economic recovery by creating local jobs.
- Being backed by a reconstruction project, SRF is a **real investment value**.

Digital Currency Advantages

- **Blockchain Technology:** Built on Polygon Smart Chain (POL) to ensure transparency, high security, speed, and scalability.
- **Smart Contracts:** Automate secure and transparent fund distribution.
- **Transaction Transparency:** All transactions are recorded on the blockchain for the best Transparency and accountability.
- **Ease of Payment:** Digital wallets simplify transactions for salaries, trade, and community investments.
- **Cost Reduction:** Lower transaction fees compared to traditional banking systems.
- **Local Trading Capability:** Usable within Syria's growing digital economy.

Tokenomics

- **Type:** Decentralized digital currency.
- **Total Supply:** 100 billion SRF tokens.
- **Initial Circulating Supply:** 1.5% at exchange listings.
- **Initial Token Price:** \$0.018 per SRF.
- The token's smart contract is published and fully verified.
- Fully audited smart contract, compatible with wallets such as MetaMask and Trust Wallet.

Distribution Details

- **Reconstruction and Development Projects:** The core real-world project backing the currency.
- **Development Team Allocation:** Dedicated share for ongoing development to achieve future goals.
- **Community Incentives:** Reward programs for active participants and token stakers.
- **Marketing and Strategic Partnerships:** Allocation for marketing campaigns and strategic alliances with supporting companies and platforms.
- **Reserve Fund:** To address any future contingencies.
- **Liquidity Provision:** Dedicated share for launching and funding centralized and decentralized markets.

Frame-work

Financial Flow and Capital Recycling

Token Burn Mechanism

SRF employs a **strategic token burn policy** to support price stability and enhance market value. Burns occur under two main circumstances:

- **Profit-Linked Burns:** A portion of periodic profits, determined by the Board of Directors, is used to buy SRF tokens at market price and burn them. This reduces supply and increases token value. This process represents the distribution of a portion of profits to support the currency's value and its holders, serving as an indirect return for Currency holders.
- **Market Stability:** Burns are initiated during significant sell pressure or price declines to maintain a supply-demand balance. All burns are executed transparently and verifiably on the blockchain to ensure credibility.

Staking Program

Goal

A long-term staking system rewarding SRF currency holders and encouraging them to keep it while supporting reconstruction projects in a transparent, sustainable manner

Rewards Pool

- Total Pool: 10% of the total token supply.
- Distribution Period: 5 years (to ensure long-term sustainability).
- Annual Distribution: 20% of the pool.
- Monthly Distribution: Approximately 1.67% of the pool.
- Revenue Sources: A combination of the Rewards Pool, project profits, and a portion of platform fees.

Transparency & Security

- All distributions are executed through audited smart contracts.
- A public dashboard provides real-time staking data on the blockchain.
- Quarterly financial reports detail project profits and pool performance

Staking Tiers

Bronze tire
3-Month Lock period Annual yield of 6% with flexible withdrawal upon completion of the lock period

Silver tire
6-Month Lock period Annual yield of 10% with priority access to airdrops and exclusive events.

Gold tire
12-Month Lock period Annual yield of 14% plus complimentary allocations from new projects.

Diamond tire
18-Month Lock period Annual yield of 18% plus a share of profits from real projects and exclusive benefits.

Profit & Loss Mechanism

- **Profits:** Distributed monthly based on the number of staked tokens, lock-up duration, and chosen tier.
- **Losses:** The staked principal remains intact in quantity, but its market value may fluctuate with market prices.

Sustainability Factors

- Implementing a burn mechanism for a portion of transaction fees to support token value.
- Allocating 10% of annual project profits to the Rewards Pool.
- Regular review of yields to ensure they remain realistic and sustainable

Donate Now

Join the Ranks of Syrian Patriots

We believe that **love for one's country** is measured by **action, not words**. For this reason, we have created a **"Donate Now"** button on our website for those who wish to support Syria's reconstruction without engaging in the world of digital currencies.

Through this channel, anyone can contribute to rebuilding Syria by making a **financial donation**, which will either be used to **purchase SRF tokens** and reinject them into the project's economic ecosystem or **allocated according to the donor's preference**.

All donations are managed with full transparency by the administration, fueling real on-ground reconstruction projects and generating returns that directly benefit hardworking individuals. This grants every donor the honor of joining the ranks of **patriots who act rather than dream**.

Future Plans

As part of our long-term vision, we are committed to expanding SRF's capabilities to become more integrated and impactful within the digital economy. Our future roadmap includes:

- **Digital Identity Verification (KYC):** Developing a secure, internationally compliant verification system to protect users and ensure regulatory compliance.
- **Banking System Integration:** Connecting SRF to local and regional banking networks to facilitate seamless deposits and withdrawals.
- **Proprietary Blockchain:** Building a dedicated SRF blockchain network to enhance efficiency, control, and support for smart contracts.
- **Transparency and Digital Governance (DAO):** Implementing community voting and participation mechanisms to ensure transparency and collective decision-making.
- **Dedicated Trading Application:** Launching a specialized SRF trading app to streamline currency exchange.
